PERFECT SHADOW

Since 2005, Nesling® is the manufacturer of shade sails. The Nesling® Coolfit® shade sails, harmonica shades and roller blinds are made of a strong HDPE fabric. This fabric protects up to 95% against damaging UV Rays. Very functional! But, perhaps just as important, you can create a cosy and decorative place in your garden or on your terrace.

Next to the Coolfit® shade sails, the waterproof Dreamsail® shades are also part of the assortment. This way you can stay outside during light rain.

Give your garden atmosphere and cosiness with a Nesling® aluminium pergola or build your own wooden pergola using the Nesling pergola kits. The aluminium pergola is combined with a Coolfit® or Prosail® harmonica shade.

Nesling® provides quality. This can not only be seen on the high quality woven polyester (285gr/m2), but also on the finishing of our shades. To install the shade sails Nesling® provides high quality 316 AISI mounting materials. This stands for the highest quality stainless steel available on the market.

IMPORTANT

- Check product availability with your dealer. Products that are not in stock at your dealers' may be able to be ordered.
- For print and type errors no responsibility is accepted. Deviations between colours in the brochure and actual colours can occur due to printing technology.

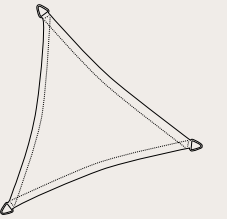

IN THE SHADE BUT NOT IN THE DARK

The Coolfit® shade sail is very versatile and a perfect addition to a garden and terrace. But certainly also suitable for business purposes such as catering establishments or daycare centers. Thanks to the open structure, the fabric is water and wind permeable and therefore it can stay outside throughout the season (March to September).

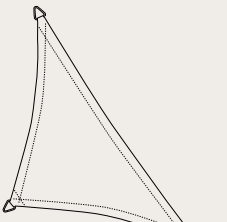

The Coolfit® fabric is easy to clean with lukewarm water, a soft brush and green soap. The edges are finished with reinforcement tape. On the corners the shade sail contains stainless steel 316 delta rings.

THE COOLFIT® SHADE SAIL IS AVAILABLE IN THE FOLLOWING COLORS

The Coolfit® fabric is made of HDPE woven fabric of 285 g/m². The fabric has an open structure and is therefore water and wind permeable.

ENJOY OUTDOOR LIVING ALL YEAR LONG

You can enjoy your garden or terrace longer with the Dreamsail® shade sail. Thanks to the finely woven fabric and PU coating, this fabric is waterproof. So stay outside with light rain. The Dreamsail® shade sail needs to be hung at minimum of 30° angle to ensure a good drainage.

The Dreamsail® fabric is also easy to clean with a soft brush, lukewarm water and green soap. All around the shade is finished with reinforcement band with triangular corners Stainless steel 316 delta rings.

COOLFIT®
HARMONICA SHADE
water permeable

**SUN OR SHADE.
IT'S YOUR CHOICE**

Easily determine the amount of sun on the terrace with the Coolfit® harmonica shade. The shade runs over stainless steel cables and can open or close manually. In addition, the Coolfit® harmonica shade is supplied including mounting material; pulleys, rods, steel cables, rope and tensioners. Easy to install by using the included assembly instructions and our assembly videos on the website.

Nesling recommends to remove the Coolfit® harmonica shade in the winter. To make it easier there is a winter cover available. With this cover the harmonica shade can stay outside during the winter

ENJOY THE OUTDOORS IN ANY WEATHER

Enjoy the outdoors even longer with the Prosail® waterproof harmonica! This waterproof harmonica shade offers not only the advantages of a harmonica shade, but those of a waterproof shade sail as well. The Prosail® can be easily opened and closed with a rope and pulley system. When the fabric is fully folded in, no steel wires are visible. The view is therefore completely free thanks to the conductors onto which the Prosail runs. The canvas is made of high-quality acrylic and is completely waterproof. This way you are dry during a rain shower.

SHADE AND PRIVACY

The Coolfit® roller blinds are ideal in low sun conditions. In addition to the sun protection, the roller blinds also provide an intimate atmosphere. Mounting is possible both on the window frame as well as inside the window frame. The blinds are also made from the Coolfit® fabric, which means that they filter up to 95% of harmful UV rays and are wind permeable.

The roller blinds are excellent to combine with a Nesling® pergola (see page 10 and 11) or with the Flex frame (see page 14).

PERFECT COMBINATION

The Coolfit® free-arm parasol is the ideal combination of a parasol frame and a shade sail. This way you enjoy both the convenience of a parasol, but also the benefits of a shade sail. The Coolfit® free-arm parasol protects up to 95% against harmful UV rays. Because of the open structure the feeling of spaciousness and airiness remains. Thanks to the universal frame the parasol is suitable for most bases.

EASY SUN SHADE FOR THE BALCONY

A Flex Frame in combination with a Coolfit roller blind creates a balcony awning in no time. The Flex Frame consists of two posts with one intermediate arm and should be clamped between floor and ceiling. You can even mount several Flex Frames next to each other with a connection post.

Suitable for all Coolfit roller blinds from 148 cm. Smaller sizes can be produced on request.
